

Trusted, Reliable
Digital Mapping Solutions

AbaData Lite™

AbaData GPS™

Direction Map

Timely. Accurate. Complete.

We've become Western Canada's leading supplier of maps to the petroleum industry because we create responsive, reliable, user-friendly mapping products. That approach has also made our digital mapping tools among the most popular in the industry. And when you start a subscription with us, you'll see our entire approach is unique – support and training are offered free of charge, and we'll never lock subscribers into long-term contracts. To learn more about us or to try AbaData™ for free, visit www.abacusdatagraphics.com.

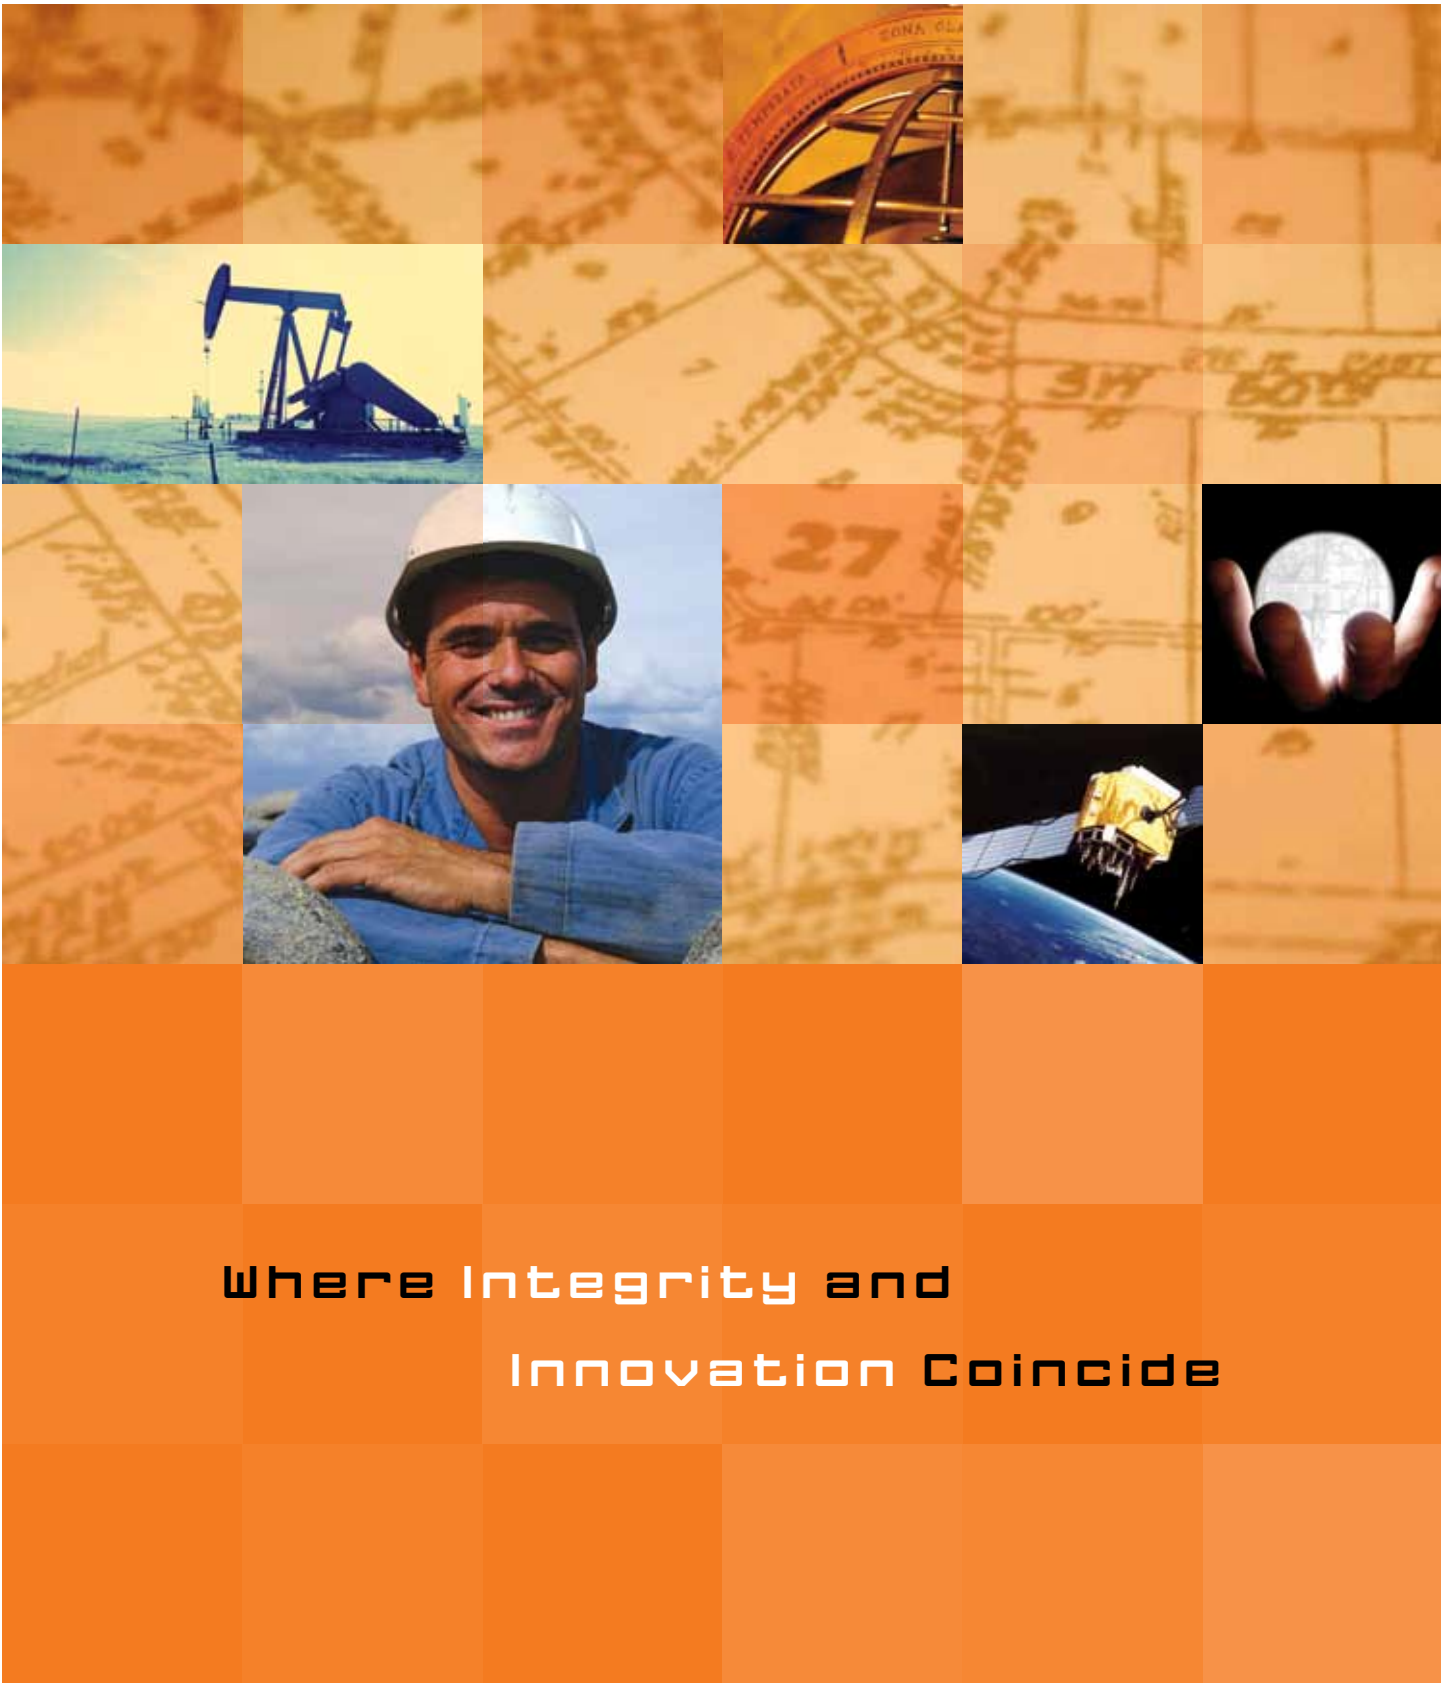

AbaData™

Our flagship digital product – distinct from competing programs because it was developed with the focus on the end user. The result? AbaData™ has evolved into one of the industry's most popular and user-friendly oil and gas mapping software tools. The ever-expanding subscriber base includes large and small oil and gas producers, reclamation and environmental contractors, engineering firms, pipeline integrity consultants, ground disturbance professionals and many others with one common need: Reliable, consistently updated information that can be quickly and easily obtained.

Datasets include:

- ERCB pipelines and wells
- More than 300,000 well site survey plans
- Paved and unimproved roads
- ERCB spills and complaints
- Survey plans including pipeline right-of-ways
- Aerial and satellite photography
- AGRASID soil data
- Crown mineral rights holders
- AltaLIS contour lines and Crown Land dispositions
- Alberta Environment water wells

Where Integrity and
Innovation Coincide
